

MaxSteel

YEARS

IN STAINLESS STEEL

IN STAINLESS STEEL

Supply with the max, serve till the max.

About MaxSteel

Found in 2019, MaxSteel developed to be a **stainless steel high-Tec** company. We focus on all kinds of metal products and project decoration. Our product line includes

Aluminum honeycomb panel

Stainless steel decorative sheet

And **Customized metal works**

They are widely use for High end hotel inner decoration, Luxury Shopping Mall decoration and the other public places where need exclusive metal products.

With more than 15 years jobsite engineering practice experience, **MaxSteel** team will discuss and study every case with our customers, we wish our professional suggestion can bring the value to both us, like creating the marketable metal product, improving the effective communication, building stable relationship between us.

Thank you!

Our Culture

Passion

A young team united with passion.

Innovation

Open minded to embrace any of your surprises.

Our Culture

Reliability

The only thing that we are always pursuing.

Efficiency

Time is money, so why not earn more?

Our Products

Stainless Steel Handles

Stainless Steel
Architectural Sheets

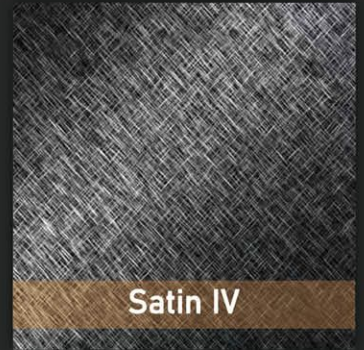

Stainless Steel Partition

Stainless Steel
End Products

Our Surface Finish

Hairline, Vibration, Mirror, Bead Blast, PVD Coating ...

we provide **FULL** options to fulfill your demand.

Our Crafting

Bending

You can rely on our accuracy.

As the critical procedure in metalwork production, we can do it with high accuracy. Angular tolerance should be ± 0.5 , while size tolerance should be $\pm 0.3\text{mm}$ along with excellent performance.

Our Crafting

Welding

A perfect welding is a basic for us.

Welding is a fabrication or sculptural process that joins materials. Defect detection inspection shall be carried out for welding seams and defects shall be removed.

The excess weld metal of welding seams must be eradicated and abraded after welding. Our final workpieces will look perfect and with strong joint.

Our Crafting

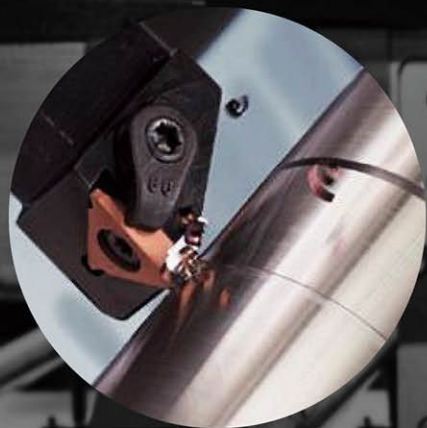

Laser Cutting

We are precision metal cutting specialists.

The Maximum Output	5000W
Cutting Range	6M x 2M
Working Thickness of Stainless Steel	≤20MM
Working Thickness of Steel/Iron	≤25MM
Working Thickness of Aluminum	≤12MM

Our Crafting

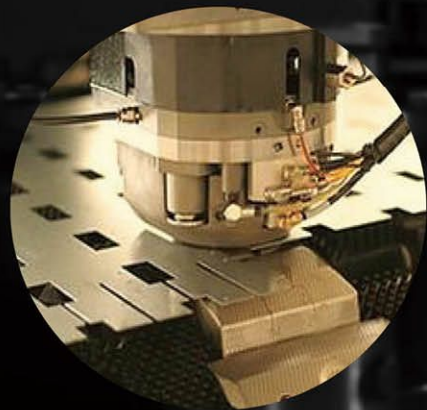

Grooving

MAXSTEEL is the sharp graving knife.

Like the graving knife, the clear V-shaped notch is gradually formed in metal sheet surface in all thickness.

Our Crafting

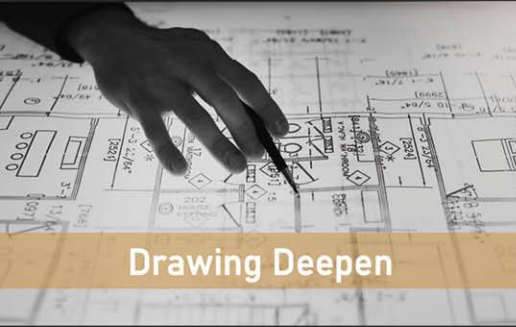

Punching

Specify every punch into reliable data.

Working Range	1250 x 2500 MM
Working Range – REPOSITIONING	1250 x 5000 MM
The Maximum Thickness of the Sheets	6.4 MM
The Maximum Weight of Workpiece	150 KGs
Accuracy of Positioning	± 0.1 MM
Accuracy of Re-Positioning	± 0.03 MM
